

Espoma Organic_® All Season Lawn Food 9-0-0

✓ Safe for kids, pets & the environment
✓ Won't burn lawns or leach out of soil

- ✓ Provides long lasting nutrition
- ✓ Creates healthy lawns & soil
- ✓ Requires less frequent mowing

All Season Lawn Food

Espoma Organic_® All Season Lawn Food 9-0-0 GUARANTEED ANALYSIS

Total Nitrogen (N)9.0%	
0.1% Ammoniacal Nitrogen	Active Ingredients: Contains a total of 6,000,000 Colony Forming Units
1.3% Other Water Soluble Nitrogen	(CFU) per gram of the following species:
7.6% Water Insoluble Nitrogen*	Bacillus amyloliquefaciens 1,000,000 CFU/gram
Calcium (Ca)1.0%	Bacillus licheniformis 1,000,000 CFU/gram
Sulfur (S)	Bacillus megaterium 1,000,000 CFU/gram Bacillus pumilus 1,000,000 CFU/gram
	Bacillus subtilis 1,000,000 CFU/gram
Derived from: Feather Meal & Poulty Manure.	Paenibacillus polymyxa 1,000,000 CFU/gram
*7.6% Slow Release Nitrogen from Feather Meal	99.9% Inert Ingredients (inert as a non-plant
& Poultry Manure.	food ingredient) – Fertilizer

Bio-tone Beneficial Microbes

Contains Bio-tone Microbes that help make nutrients more available to your lawn. These microbes will help promote faster greening, deeper roots, and improved soil structure

Where to Use

For use on all lawns including newly seeded and sodded areas.

When to Use

Use as an All Season Lawn Food: Apply 4 times per year: Early Spring, Late Spring, Late Summer, & Fall, or anytime. When used as part of the Espoma Annual Program, apply April through June.

Application Rate

If clippings are returned: Apply at a rate of about 6 lbs. per 1,000 sq. ft. If clippings are removed: Double the rates above for Late Spring and Fall applications only. (28 lbs. covers up to 5,000 sq. ft.).

How to Use

Apply to a dry lawn that has recently been mowed. Use a drop or broadcast spreader and be certain to overlap slightly to prevent striping. For best results water lightly after the application if rain is not expected within 24 hours.

Helpful Lawn Hints

- ✓ No buzz cuts. Raise your cutting height to at least 3 inches. This helps the grass develop stronger roots while it shades the soil making weed seed germination difficult.
- Keep mower blades sharp. Never remove more than 1/3 of the grass blade in a single cutting.
- ✓ **Use a mulching mower**. Yearly nitrogen requirements can be reduced by up to 1/3 when grass clippings are returned to the lawn.
- ✓ Check pH annually. Most varieties prefer a pH of 6.5 to 7.0. Adjust with Espoma Organic Lightning Lime_® to raise, and Espoma Organic Soil Acidifier to lower pH.
- ✓ Water thoroughly. Most turf grasses will require 1 inch of water per week. In spring and fall, long and deep watering is preferred. In the heat of summer, lighter but more frequent watering is recommended. It is best to water in the morning.
