

Espoma Organic® Summer Revitalizer 8-0-0

- ✓ Safe for kids, pets & the environment
- ✓ Won't burn lawns or leach out of soil
- ✓ Provides long lasting nutrition
- ✓ Creates healthy lawns & soil
- ✓ Requires less frequent mowing

5,000 Sq. Ft. Espoma Organic Feeding Schedule

Summer Revitalizer FACT SHEET

Espoma Organic® Summer Revitalizer 8-0-0 GUARANTEED ANALYSIS

Total Nitrogen (N).....8.0%	ALSO CONTAINS NON PLANT FOOD INGREDIENTS:
0.1% Ammoniacal Nitrogen	Active Ingredients:
1.2% Other Water Soluble Nitrogen	Contains a total of 6,000,000 Colony Forming Units (CFU) per gram of the following species:
6.7% Water Insoluble Nitrogen*	Bacillus amyloliquefaciens 1,000,000 CFU/gram
Calcium (Ca).....1.0%	Bacillus licheniformis 1,000,000 CFU/gram
Sulfur (S).....1.0%	Bacillus megaterium 1,000,000 CFU/gram
Iron (Fe).....2.0%	Bacillus pumilus 1,000,000 CFU/gram
	Bacillus subtilis 1,000,000 CFU/gram
	Paenibacillus polymyxa 1,000,000 CFU/gram
Derived from: Feather Meal, Poultry Manure, Ferric Oxide & Elemental Sulfur.	99.9% Inert Ingredients (inert as a non-plant food ingredient) - Fertilizer
*6.7% Slow Release Nitrogen from Feather Meal & Poultry Manure.	

Bio-tone® Microbes Plus Non-Staining Iron

Contains Bio-tone Microbes that help make nutrients more available to your lawn which will help promote faster greening, deeper roots, and improved soil structure. To this we add a natural non-staining Iron to help ensure a healthy deep green color.

Where to Use

For use on all lawns including newly seeded and sodded areas.

When to Use

Apply in the Early Summer:

- Cool Season Grass - Apply in July or August
- Warm Season Grass - Apply in June or July

Application Rate

Apply at a rate of 6 lbs. per 1,000 sq. ft. (30 lbs. covers up to 5,000 sq. ft.).

How to Use

Apply to a dry lawn that has recently been mowed. Use a drop or broadcast spreader and be certain to overlap slightly to prevent striping. For best results water lightly after the application if rain is not expected within 24 hours.

Helpful Lawn Hints

- ✓ **No buzz cuts.** Raise your cutting height to at least 3 inches. This helps the grass develop stronger roots while it shades the soil making weed seed germination difficult.
- ✓ **Keep mower blades sharp.** Never remove more than 1/3 of the grass blade in a single cutting.
- ✓ **Use a mulching mower.** Yearly nitrogen requirements can be reduced by up to 1/3 when grass clippings are returned to the lawn.
- ✓ **Check pH annually.** Most varieties prefer a pH of 6.5 to 7.0. Adjust with Espoma Organic Lightning Lime® to raise, and Espoma Organic Soil Acidifier to lower pH.
- ✓ **Water Thoroughly.** Most turf grasses will require 1 inch of water per week. In spring and fall, long and deep watering is preferred. In the heat of summer, lighter but more frequent watering is recommended. It is best to water in the morning.
