Soluble Potash (K ₂ O)	5.0%
Calcium (Ca).....	1.0%
Sulfur (S).....	1.0%

Derived from: Feather Meal, Meat Meal, Blood Meal, Poultry Manure, & Sulfate of Potash.

*6.7% Slow Release Nitrogen from Feather Meal & Poultry Manure.

Winter Formula

Supplies long lasting nitrogen, an essential nutrient that helps to promote a thicker lawn and vigorous growth. It is also fortified with potassium, a nutrient that helps the lawn recover from summer drought conditions, enhances winter hardiness and helps promote a better Spring greening the following season.

Where to Use

For use on all lawns including newly seeded and sodded areas.

When to Use

Apply in the Fall (September or October).

Application Rate

Apply at a rate of 6 lbs. per 1,000 sq. ft. – 30 lbs. covers up to 5000 sq. ft.

How to Use

Apply to a dry lawn that has recently been mowed. Use a drop or broadcast spreader and be certain to overlap slightly to prevent striping. For best results water lightly after the application if rain is not expected within 24 hours.

Helpful Lawn Hints

- ✓ **No buzz cuts.** Raise your cutting height to at least 3 inches. This helps the grass develop stronger roots while it shades the soil making weed seed germination difficult.
- ✓ **Keep mower blades sharp.** Never remove more than 1/3 of the grass blade in a single cutting.
- ✓ **Use a mulching mower.** Yearly nitrogen requirements can be reduced by up to 1/3 when grass clippings are returned to the lawn.
- ✓ **Check pH annually.** Most varieties prefer a pH of 6.5 to 7.0. Adjust with Espoma Organic Lightning Lime® to raise, and Espoma Organic Soil Acidifier to lower pH.
- ✓ **Water thoroughly.** Most turf grasses will require 1 inch of water per week. In spring and fall, long and deep watering is preferred. In the heat of summer, lighter but more frequent watering is recommended. It is best to water in the morning.
