Derived from: Feather Meal, Meat Meal, Blood Meal, Poultry Manure, Bone Meal, & Sulfate of Potash.

*2.6% Slow Release Nitrogen from Feather Meal, Meat Meal, Blood Meal, Poultry Manure, and Bone Meal.

Lawn Starter Formula

A premium lawn food that is ideal for establishing new lawns from seed or sod. It is higher in phosphorus than our other lawn foods in order to help grow strong roots. It is made from natural and organic plant food ingredients and contains no sludges or fillers. The Organics in Lawn Starter break down gradually to provide a long-lasting food reservoir throughout the growing season.

When to Use

Apply when seeding a new lawn, overseeding an existing lawn, or starting turf from sod or plugs.

Application Rate

Apply at a rate of 10 lbs. per 1,000 sq. ft. – 30 lbs. covers up to 3000 sq. ft. NEW SIZE: 6.75 lbs. covers up to 675 sq. ft.

How to Use

If overseeding an existing lawn cut the grass first. Then apply Lawn Starter with a drop or broadcast spreader and be certain to overlap slightly for best coverage. After seeding or sod installation, water and keep the area moist with light frequent watering until the new grass has been cut twice. Resume normal watering thereafter.

Helpful Lawn Hints

- ✓ **No buzz cuts.** Raise your cutting height to at least 3 inches. This helps the grass develop stronger roots while it shades the soil making weed seed germination difficult.
- ✓ **Keep mower blades sharp.** Never remove more than 1/3 of the grass blade in a single cutting.
- ✓ **Use a mulching mower.** Yearly nitrogen requirements can be reduced by up to 1/3 when grass clippings are returned to the lawn.
- ✓ **Check pH annually.** Most varieties prefer a pH of 6.5 to 7.0. Adjust with Espoma Organic Lightning Lime® to raise, and Espoma Organic Soil Acidifier to lower pH.
- ✓ **Water thoroughly.** Most turf grasses will require 1 inch of water per week. In spring and fall, long and deep watering is preferred. In the heat of summer, lighter but more frequent watering is recommended. It is best to water in the morning.
