Total Nitrogen (N).....9.0%
0.77% Water Soluble Nitrogen
8.23% Water Insoluble Nitrogen*

Derived from: Corn Gluten Meal.

*Contains 8.23% Slow Release Nitrogen from Corn Gluten.

100% Corn Gluten

Corn Gluten Meal is, a natural by-product from the production of corn starch. It supplies long lasting nitrogen, an essential nutrient that helps to promote a thicker lawn with deeper green color and more vigorous growth.

What to Expect

In a multi-year field trial on a crabgrass infected lawn that was treated twice per year, Iowa State University reported a 58% reduction in weeds the first year, 85% the second year, and 91% the third year.

Weeds Controlled

Black medic, black nightshade, buckhorn plantain, catchweed bedstraw, common lambsquarters, curly dock, dandelion, purslane, redroot pigweed, velvetleaf, annual bluegrass, barnyard grass, giant foxtail, green foxtail, large crabgrass, orchardgrass, quackgrass, shattercane, smooth crabgrass, wolly cupgrass, and yellow foxtail.

Where to Use

For use on Established Lawns. Do NOT use when seeding a new lawn or overseeding.

When to Use

Apply 2 x a year: Early Spring & Fall

Use in early Spring before weed seeds germinate.

A second application in early Fall is also recommended.

Application Rate

Lawns: 20 lbs. per 1,000 sq. ft. covers up to 1,250 sq. ft.

Lawn food only: 10 lbs. per 1,000 sq. ft. covers up to 2,500 sq. ft.

How to Use

Apply to a dry lawn that has recently been mowed. Use a drop or broadcast spreader and be certain to overlap slightly to prevent striping. For best results water lightly after the application if rain is not expected within 24 hours.
